Any room that demands strength in its decorative accessories is the perfect place for our Nallan Silver Large Vase. This is one of our creations that looks as if it could have been sourced from a dealer who unearths valuable antiquities but it has just been made. Created from cast aluminum in a mix of nickel antique and black finishes, the shape of its profile is as time-honored as vessels come. We also offer the Nallan in silver in a smaller size and in an antique brass finish.
